TEACHING ENGLISH AND YOU

A Very Brief Intro to ESL Theory and Methods
Fulbright ETA PDO 2016

Renee Lynch, lynchren@gmail.com
INTRODUCTIONS

Renee Lynch and Molly FitzPatrick

FIND SOMEONE WHO

Ice breaker

Renee Lynch, lynchren@gmail.com
THINK PAIR SHARE

Would you use this activity (Find Someone Who) in your African classroom?
If no, why not?
If yes, for what purpose?

Renee Lynch, lynchren@gmail.com
Second Language Acquisition, Bloom’s Taxonomy, Learner Differences
Language is...

...an innate ability.
...learned through natural communication.

- Foreign languages (L2) are acquired in the same way as a baby learns a mother tongue (L1)
- Not simply a learned response to environmental factors (Skinner)
- Aligned with Chomsky and his idea of Universal Grammar

Contested and challenged but most widely accepted
Second Language Acquisition
Dr. Stephen Krashen

■ “The Monitor Model” - combination of 5 theories
  - The Acquisition Learning Hypothesis
    ■ We acquire language naturally but learning is a conscious process. Natural communication is required to fully acquire a language.
  - The Monitor Hypothesis
    ■ We use what we learn to self-correct our own language.
  - The Natural Order Hypothesis
    ■ Structures are learned in a predictable order for all learners (but not based on complexity.)
  - The Input Hypothesis
    ■ Learners need input that they can understand and use to build further knowledge (i+1)
  - The Affective Filter Hypothesis
    ■ Processing input can be blocked by anxiety, poor self-esteem or low motivation.

Renee Lynch, lynchren@gmail.com
The Input Hypothesis Model of L2 learning and production (adapted from Krashen, 1982, pp. 16 and 32; and Gregg, 1984)
"The best methods are therefore those that supply 'comprehensible input' in low anxiety situations, containing messages that students really want to hear. These methods do not force early production in the second language, but allow students to produce when they are 'ready', recognizing that improvement comes from supplying communicative and comprehensible input, and not from forcing and correcting production."

THINK PAIR SHARE

What would you do as a teacher to make this happen in the classroom? How does this activity (Think Pair Share) contribute to that?
What would you do as a teacher to make this happen in the classroom?

How does this activity (Think Pair Share) contribute to that?

"The best methods are therefore those that supply 'comprehensible input' in low anxiety situations, containing messages that students really want to hear. These methods do not force early production in the second language, but allow students to produce when they are 'ready', recognizing that improvement comes from supplying communicative and comprehensible input, and not from forcing and correcting production."

Bloom’s (Revised) Taxonomy
Benjamin Bloom and Anderson & Krathwohl (2001)

Analyze, Evaluate & Create

Apply

Understand

Remember
Individual Differences in Language Learners:
Multiple Intelligences (Gardener)

Renee Lynch, lynchren@gmail.com
Individual Differences in Language Learners: Lightbown & Spada (2006)

- Learning Style: learner’s “natural, habitual, preferred way of absorbing, processing, and retaining new information and skills”
- Intelligence
- Aptitude - in speaking, writing, reading, etc.
- Personality
- Motivation and Attitude
- Identity: ethnic affiliations, social dynamics, and power relationships
- Learner beliefs about learning
- Age of acquisition: Critical Period Hypothesis (disputed)
METHODS

Communicative Language Teaching, Learner-Centered Methodology

Renee Lynch, lynchren@gmail.com
Communicative Language Teaching (CLT)

The affective filter hypothesis model of L2 learning and production (adapted from Chen, 1982, pp. 16 and 32; and Gregg, 1984)
Communicative Language Teaching (CLT)

- Successful language learning involves meaningful interaction.
- vs. manipulation of grammatical forms in isolation
- Errors are natural and valuable
- Corrective feedback through negotiating meaning with others

... knowledge of structures and forms.

... knowledge of functions and purposes.

- Ability to notice and adapt to different communicative settings

→ Exposure to comprehensible input AND direct instruction

Renee Lynch, lynchren@gmail.com
Teacher Centered vs. Learner Centered Knowledge

Renee Lynch, lynchren@gmail.com
Teacher Centered vs. Learner Centered Teacher

Renee Lynch, lynchren@gmail.com
Teacher Centered vs. Learner Centered Activities

Renee Lynch, lynchren@gmail.com
Key Principles to be Explored

- Scaffolding
- “The Four Skills” = Reading, Writing, Listening, Speaking
  - And Grammar. And Vocabulary. And Pronunciation.
  - Receptive and Productive Skills – Integrated
- Content or theme-based learning
  - English for Academic Purposes (EAP)
  - English for Specific Purposes (ESP)
- Authentic materials and assessment
  - “Real-life”
  - Task-based assessment
  - Meaningful and relevant to learners

Renee Lynch, lynchren@gmail.com
I’m ready for a coffee break.
This activity (Four Corners) is learner-centered and communicative.
I would use this activity (Four Corners) in my African classroom.

Renee Lynch, lynchren@gmail.com
Belief in theories and uptake of methods are dependent on:

- Historical period
- Culture
  - Social norms
  - Beliefs about teaching and learning
- Resources available
  - Classroom: Books, electricity, lab equipment, etc.
  - Community of practice
    - Models
- Personal experience
  - Personal tastes
  - Learning experience
- Others?
